DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6-13, drawn to a mulch plug, classified in class 56, subclass 320.2.
 - II. Claims 14-24, drawn to belt cover, classified in class 474, subclass 144.
 - III. Claims 25-31, drawn to a collecting apparatus & side discharge latching device, classified in class 56, subclass 202.

The inventions are distinct, each from the other because of the following reasons:

Inventions I & II & III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a mulch plug (group I), drawn to belt cover (group II), and collection apparatus & side discharge latching device (group III).

Because these inventions are distinct for the reasons given above and the search required for Group I/II/III is not required for Group I/II/III restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3671

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
